NICRMATION REPORT INFORMATION REPORT

25X1

-2-

4. At 1200 hours GMT on 14 June. a large naval vessel was on a northerly course north of Kildin Island.

than the vessels described above. It had a raked bow, a flush deck, a reverse sheer on the foredeck, a mast at after edge of the bridge, two similar funnels with raked cowls, and a cruiser stern (see sketch No. 3).

25X1

5. The arrival and departure inspections at Onega were more lenient than had ever experienced. The inspection commission consisted of two officers, one customs man, one telegrapher, and one doctor. The officers had green uniforms with yellow shoulder boards, with three and two stars in line, respectively. The grew was not turned out but they had to remain in their quarters while the commission went around and checked passports. The ship was not investigated. The inspection on arrival took about three-fourths of an hour. On departure it took only about 20 minutes and the only thing the commission did was to check the passports against the crew list and to collect all the shore passes.
